CENTRE FOR DISASTER MANAGEMENT AND LAW

PRESENTS

**1ST ARTICLE WRITING COMPETITION ON LEGAL
ASPECTS OF CORONAVIRUS PANDEMIC**

In association with Media Partner

KATCHERI.IN

ABOUT THE CENTRE

The Centre for Disaster Management and Law has been set up with an objective to promote vivid research in the field of Disaster Management. It is emerging globally as a full-fledged academic discipline. In the backdrop of its evolution from the practitioner's domain, its boundaries have been permeable. However, as a field of research, it demands specialisation to meet with the dynamic challenges posed by not only conventionally categorised disasters but new ones not viewed traditionally as disasters.

As India is a country vulnerable to disaster, comprehensive research on disaster management is quintessential to minimise its adverse impact on the growth of the country. The legal framework related to Disaster Management remains a grey shaded area with a lot of ambiguities prevalent. Rehabilitation, systematic reconstruction and sustainable recovery post-disaster are an arena which requires persistent activism. The centre suggests a holistic legal resolution to deal with the integral aspects of preparedness, response and recovery. The mission of the Centre is to cater to the advancement of knowledge in disaster management, to respond to the sectoral needs and promote positive practices.

ABOUT THE COMPETITION

There are seldom times when the survivability of humanity is tested and the current situation is one of those. The recent outbreak of Covid-19 has to put test people's patience, resilience and determination to survive against the unseen enemy. One of the ways in which such pandemic can be prevented is through the implementation of different kinds of laws addressing a variety of issues like the supply of essential commodities, ban against public gathering, implementation of section 144 and varied other issues. The idea of the competition is to make analyse the different action taken by the government in such drastic times and whether such action is being taken under the ambit of law or not.

THEMES AND TOPICS

The centre invites articles on the theme of “Legal Aspects of Coronavirus Pandemic”. Some of the topics under the theme are as follows:
